## MERN Developer

rashidameer.dev@gmail.com | 0313-5212834 | linkedin.com/in/rashid-ameer | github.com/rashid-ameer

### Professional Summary

MERN Stack Developer with 1 year of hands-on experience building dynamic web applications using MongoDB, Express.js, React.js, and Node.js. Strong foundation in JavaScript and TypeScript, with practical exposure to Docker and AWS for deployment and scalability. Focused on solving problems by delivering reliable, efficient, and user-centric systems.

### Skills

**Frontend:** HTML, CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Zustand, React Query, Context API, Tailwind CSS, Bootstrap, Shadcn UI

**Backend:** Node.js, Express.js, Redis, PostgreSQL, MongoDB

**Tools & Workflow:** Docker, AWS (EC2, S3), Git, REST APIs, Agile Development, Asana

### Experience

**React Frontend Developer** Oct 2024 – Present  
*Technoholic Advance Solutions* Karachi, Sindh

- Implemented shared layouts across multiple React applications by building reusable components (e.g., sidebars, content areas), reducing UI inconsistencies and cutting development effort for new modules.
- Developed and enhanced UI features such as Kanban boards, dashboard layouts, and calendar integrations, improving interface usability and clarity.
- Built a location auto-complete input using Google Maps API, restricted to US addresses, and automated image retrieval with Google Static Maps API.
- Optimized search performance through input debouncing, reducing API load by 30% and significantly improving response time for end users.
- Integrated REST APIs for various modules, ensuring smooth data flow and responsive interactions across the application.
- Delivered fully responsive designs across desktop, tablet, and mobile, expanding accessibility and improving cross-device usability.
- Refactored complex UI blocks into clean, modular components, reducing code complexity and cutting future development time by 20%.

**Freelance MERN Developer** Jan 2024 – Present  
*Upwork* Remote

- Built and deployed full-stack products using MERN stack with secure authentication, REST APIs, and database integrations.
- Implemented Redis for caching and session management, improving backend performance and reducing request latency.
- Deployed applications on AWS (EC2, S3) using Docker and Nginx, gaining hands-on experience in scalable cloud hosting and workflows. overall application stability and user experience.
- Collaborated with international clients to gather requirements, deliver features on time, and adapt quickly to new technologies.

### Education

**BS Computer Science** Sep 2020 – May 2024  
*Sukkur IBA* Sukkur, Sindh

### Awards

Awarded a 4-year scholarship for a Bachelor's degree through the National Talent Hunt Program 2019, a collaboration between Sukkur IBA and OGDCL.
